

## **Lawrence Township**

### **Department of Public Works**

Please be advised that Lawrence Township continues to collect storm debris from all zones of Lawrence Township. The Public Works Department has collected close to 10,000 cubic yards of debris since the storm ended. The Department will continue to collect debris until all streets in Lawrence Township have been collected once. The crews then will return for a second collection. Because of the nature of the storm and amounts of debris placed at the curb, the Township has collected leaves and brush simultaneously. Once your street has been collected, all rules and regulations for the second collection will once again be enforced. Please do not place stumps at the curb or in the street for municipal collection.

Thank you very much for your patience during the storm debris collection process. Please contact the Lawrence Township Public Works Department at (609) 587-1894 with any questions.
