

WELL METERS

Property owners in Lawrence Township that have well water and are billed sewer based on the unmetered consumption rate may use the option of getting a meter attached to their well line. This would allow for a record of actual water consumption and therefore the property would be billed sewer based on the metered rate of actual water consumption.

Property owners can get the permit, free of charge, from the Construction/Code Enforcement office. Call 609-844-7056 or email plumbinginspector@lawrencetwp.com for information.

The meter and the plumber to install the meter is at the cost of the property owner and not affiliated with Lawrence Township. The face of the meter should be easily accessible as twice a year the Tax Collector will ask for a reading. Many residents take a picture of the face of the meter and email it to the Tax Collector taxcoll@lawrencetwp.com to insure accurate information.

Once you have passed final inspection by the plumbing inspector. Please contact the Tax Collector so that the information can be added to your account.
